

Monroe County Florida Keys Weather Briefing

...concerning Tropical Depression Two...

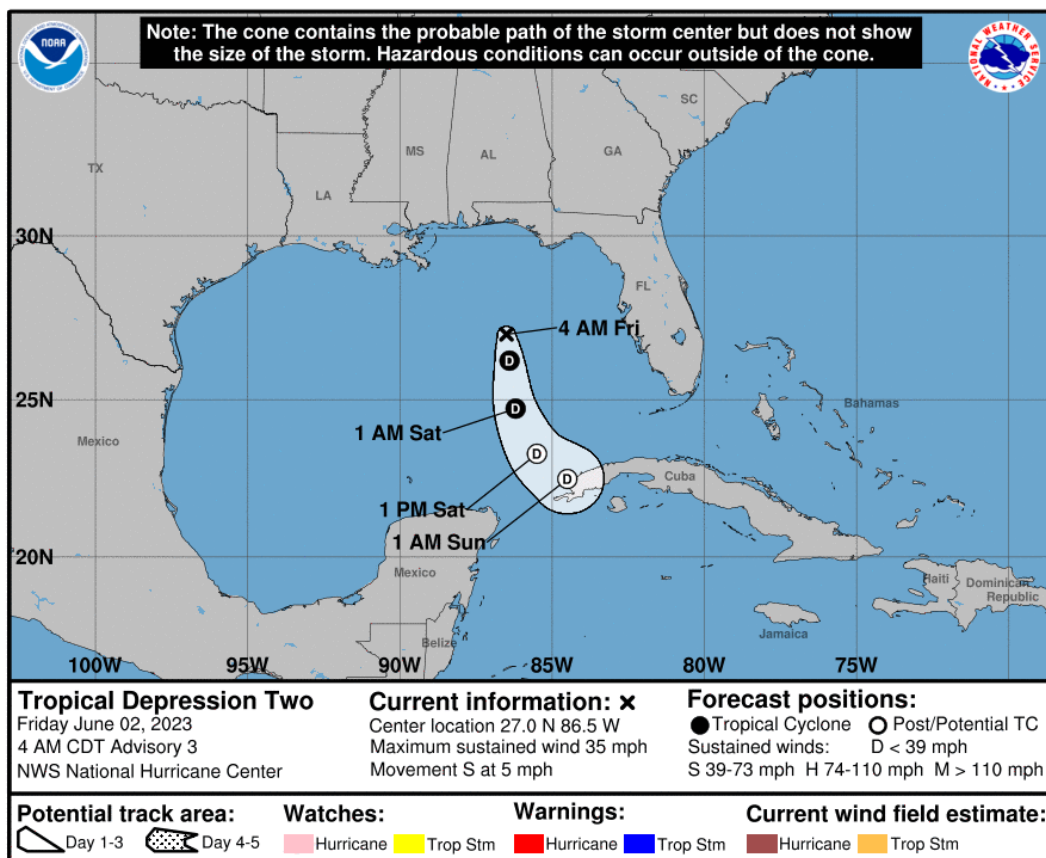

June 2, 2023 – 9:00 am EDT

This hazardous weather briefing is for local, state, federal civilian and military emergency managers serving within the Florida Keys of Monroe County, Florida.

Situation Overview:

Tropical Depression Two has been moving slowly toward the south this morning, and has maintained maximum sustained winds near 35 mph. The window of opportunity for strengthening is diminishing, with weakening expected to begin later today. The depression is expected to degenerate into a remnant low pressure area over the southeast Gulf of Mexico well to the southwest of the Florida Keys on Saturday.

No direct impacts are expected in the Florida Keys from the tropical depression. Typical early rainy season weather with slight to low chances for showers and thunderstorms each day and night is expected over the Florida Keys.

Next Update

This will be the last briefing concerning Tropical Depression Two concerning the Florida Keys of Monroe County, unless there are any significant changes in the forecast.

As always, you may contact the NWS Key West at (305) 295-1316 extension 3 to speak with a forecaster 24/7. Please contact us anytime if you need specific information (as best as the science allows) for critical hazardous weather information for decision support in your department's activities.
